Lagos, Nigeria

PROFESSIONAL SUMMARY

A highly proactive and detail-oriented Full Stack Developer with extensive experience in designing, developing, and deploying scalable software solutions. Proficient in JavaScript and its frameworks, with a deep understanding of software engineering principles, data structures, and algorithms. Demonstrates exceptional problem-solving abilities and a strong track record of effective collaboration within cross-functional teams. Dedicated to continuous learning and professional development, with a commitment to staying ahead of industry trends and advancements. Adept at delivering high-quality, efficient, and innovative solutions to complex technical challenges.

SKILLS

JavaScript | Typescript | ReactNode js | HTML | CSS | Problem solving | Attention to detail | Communication | Programming language

TOOLS

GitHub
Mongodb
Namecheap
Tailwind
React

WORK EXPERIENCE

Backend Developer

Feb'24 - Present

Enforca Technologies

Remote

- Designed, developed, and maintained RESTful APIs to support the functionality of an admin dashboard.
- Collaborated with front-end developers to integrate APIs seamlessly into the dashboard for real-time data management and analytics.
- Optimized database queries and backend logic to enhance API performance and scalability.
- Wrote comprehensive unit and integration tests to ensure API reliability and maintain high code quality.
- Utilized version control tools (e.g., Git) to manage codebase and collaborate with team members.
- Participated in code reviews and implemented feedback to improve coding standards and best practices.
- Documented API endpoints and maintained technical documentation for ease of future development.
- Worked with mentors to gain insights into backend architecture design, deployment strategies, and best practices.
- Gained hands-on experience with backend technologies such as [e.g., Node.js, Spring Boot, Django, or relevant technology used].

Software Engineer Apprenticeship

Mar’23 - Jun’24

SQI College

Ibadan, Nigeria

- Built full-stack applications utilizing the MERN stack (MongoDB, Express.js, React.js, and Node.js) to deliver dynamic and user-friendly software solutions.
- Designed and implemented RESTful APIs with MongoDB, ensuring secure and efficient backend functionalities and data management.
- Developed responsive and interactive user interfaces using React.js, adhering to modern design principles and best practices for an optimal user experience.
- Utilized React hooks (e.g., `useState`, `useEffect`) to manage application state and streamline DOM interactions effectively.
- Collaborated with design teams and senior software engineers to develop customized software products, from initial design concepts to advanced API integration.
- Contributed to debugging and resolving software issues, ensuring high-quality application performance and reliability.
- Leveraged modern JavaScript ES6+ features, including `async/await` and `promises`, to enable efficient asynchronous programming.
- Gained proficiency in version control using Git and participated in collaborative development processes via GitHub workflows.
- Prioritized tasks effectively to meet project deadlines and deliver high-quality solutions within fast-paced team environments.

EDUCATION

Bachelor's Degree in Accounting
Federal University Oye-Ekiti
Oye, Ekiti

June 2023

CERTIFICATION

Web Design certification (2023)
Javascript and Firebase Certification (2024)
MERN Stack Certification,SQI Coll ICT (2024)
